Harley Engine Sputters

So, what causes a motorcycle to sputter? There are several reasons why a motorcycle sputters. The most common reasons are carburetor issues such as a vacuum leak, fuel leak, or tuning issues. Other culprits could include corroded or cracked spark plugs or spark plug wires, a faulty ignition coil, a clogged air filter, or engine timing issues.

5 Reasons Why Your Motorcycle Is Sputtering

The problem of having an engine “sputter” is typically caused by a fuel system issue. For pit bikes with smaller cc displacement

engines, in order for a cylinder to fire efficiently, three separate components must work together; the fuel delivery system (carburetor), the ignition coil and wires and the spark plug.

My bike is sputtering whenever I give it full throttle

Hi Gang, Got to tell you I love my new 1200 C!! One question; how do I get rid of a engine sputter off idle? I think it is carburetor related; I live at about 3500 feet above sea level and I have punctured the baffles. No other mods. Thanks in advance!

Engine sputter off idle | V-Twin Forum

So this past weekend my bike [2012 Custom], has developed a new problem, I don't lose any electrical power, only the engine starts to buck, kick, stumble and pop. At an idle it will either idle high at just under 1800 rpms or stall out. It's intermittent, but has been occurring more and more...

a Harley's Twin-Cam engine. Zeroing in on this specific cam component can make you as a buyer aware of its potentially faulty design. The cam chain system of a Harley is designed with plastic shoes that ride on the cam system.

The 8 Most Common Harley-Davidson Problems & How to Handle ...

Well, I have been having the same problems that many of us on here are having with an iradic idle, hesitation under load, and sputtering up to like 3000 rpm. My idle was so bad it started dieing on its own. I took my car to the shop, and this is what was done. 1. Changed both o2 sensors (I had a check engine light) 2. replaced fuel pump
