Empedocles considered two aspects of things- the whole object and the basic particles (fire, earth, water and air) that make the objects. This argument is relatively acceptable in the philosophy of science and nature because it takes into account the fact that things, including humans, are made up of small particles and cells that may not change over time.

Foucault's Concept of Power | Philosophy Talk

One of the most widely adopted texts in the field, Philosophy: The Power of Ideas offers a topical introduction to philosophy within an overarching historical framework. The goal of the authors is to make philosophy understandable while not oversimplifying the material, showing that philosophy contains powerful ideas that affect the lives of real people.
