Tropical Deforestation | Taylor & Francis Group

Unfortunately, tropical rainforests lose an estimated 93,000 square miles each year due to deforestation, a complex issue with many underlying economic concerns. Deforestation can occur in a variety of ways, but it is mainly the result of a combination of agricultural and infrastructure expansion.

Tropical Deforestation - The Environmental Literacy Council

David Kaimowitz, a former Director General of CIFOR, explains that social, economic, and political changes affect tropical deforestation. These may include macro-economic shifts, military conflicts, technological changes in agriculture, decentralization, road construction, and various other things besides just forest or forestry policies.

Understanding how social, economic and political changes ...

tropical deforestation a socio economic approach

This paper provides a survey of 'first wave' economic studies of tropical deforestation and land use. These studies of tropical forest land conversion are generally at the cross-country level. We also conduct a synthesis cross-country analysis of tropical agricultural land expansion. The results show that agricultural development is the main factor determining land expansion, but institutional factors have an important influence.
