Zend Engine Use Cases, Reviews & Ratings 2020
since changed #define ZEND_ENGINE_3 to #degine ZEND_ENGINE_4? Was that deliberate since (unlike with 4->5 and 5->7) the engine's API surface area hasn't skewed so bad? I ask because ZEND_VERSION did get updated to the 4.x.x series.-Sara. Wasn't there discussion about dropping the ZEND_ENGINE_* constant?

ZEND_ENGINE_4 - Externals
Zend Engine is a highly optimized execution engine. It allows modules such as debuggers, performance boosters and custom loaders to dynamically extend PHP for a broader range of functionality. Whenever you're using any plug-in module today, you're doing so thanks to the extensibility support of the Zend Engine.

Microsoft .NET Framework vs. Zend PHP Engine Comparison ...
Zend PHP Engine could also improve by fixing their stability issues. Every now and then the MYSQL service calls will drop, stop being monitored or die alltogether. Any PHP developer worth his salt would point to the fact that PHP SQL queries also have this issue inherent in them - but I hope that just as much as they improved the MYSQLi queries - that they could eventually solve the issue with ...

Zend Engine Reviews & Ratings 2020 - TrustRadius

Unlike the other supported template engines, zend-view does not support layouts out-of-the-box. Expressive abstracts this fact away, providing two facilities for doing so: You may pass a layout template name or Zend\View\Model\ModelInterface instance representing the layout as the second argument to the constructor.
